YOUR VISION OF THE FUTURE ALPINE MOBILITY

SaMBA Competition 2020/2021

The competition

With this competition, the Interreg SaMBA project wants to collect visions of sustainable mobility in the Alps. From 21st of November 2020 to the 31st of March 2021 you can participate in the competition and win a prize!

Who can participate?

Every citizen or group of citizens from the Alpine region in Italy, France, Austria, Slovenia and Germany is welcome to participate and to send in their contributions.

How to participate?

The SaMBA competition awards innovative and high-quality videos (maximum 1 minute) and photos including an explanation (of maximum 1000 characters), which represent your vision of the future Alpine mobility. Please send your contributions to the following mail address:

samba@climatealliance.org

The project consortium will independently select the winners, based on the following criteria:

- Thematic reference to sustainable mobility (50 %)
- High-quality of submission (20 %)
- Innovation and creativity of submission (30 %)

Contributions can be submitted in English, Italian, German, French and Slovene. By submitting a contribution to the competition, the participant agrees to the display of his/her video or photo on the SaMBA website and the YouTube channel of Climate Alliance.*

What are the prizes?

The most outstanding video or photo will be awarded with a trip to Turin, Italy and the final conference of the SaMBA project in early summer of 2021. Travel costs and accommodation will be covered for the winner (if the winner is under 18 years old, travel costs for a legal guardian will also be covered). In case travelling will by then not be possible due to COVID-19 restrictions, an alternative will be sought on an individual basis.

The second and third place will receive a 'mobility surprise package'.

More information can be found on alpine-space.eu/samba.

*Climate Alliance is part of the SaMBA consortium

We are looking forward to your submissions!

The SaMBA project is co-financed by the European Regional Development Fund through the Interreg Alpine Space programme.
